

Vaioni Business Broadband

Reliable, low-cost, business-class connectivity

Business connectivity begins with broadband but not all businesses need a superfast, fully featured Ethernet connection.

With speeds up to 80Mbps download and 20Mbps upload, our low-cost business broadband is ideal for businesses who aren't reliant on an internet connection to run their key business operations, or for those looking at supporting their existing connection.

Key Features:

- Business class broadband
- No bandwidth shaping
- No port restrictions
- No data caps
- No peak/off peak speed limits
- 1 or 4 IP addresses as standard
- UK-based support team

Benefits:

Meet your needs

Why pay for excessive bandwidth and features which you won't utilise? We offer entry-level business broadband for those who don't rely on

superfast downloads, or FTTC broadband for those who need faster download speeds. We give you the choice so you can find the right access at the right price.

No limits

We won't overcharge you for high data usage, or restrict your upload or download speeds at any time. We guarantee you'll always get the very best, each and every time.

Boost your connectivity

Due to its low cost but high reliability, Vaioni Business Broadband can easily be used to backup existing connections, support in disaster recovery, or supplement a leased line connection.

Extraordinary support

Our highly skilled, UK-based support team are one call away from helping you with any issues you may face 24/7. We're so confident in our network reliability that we'll credit a day's cost for every hour of downtime you experience with no quibbles.

“ We have had excellent service using Vaioni. They've always been really helpful and I cannot praise them highly enough. ”

“ We've been with Vaioni for a few years now and it's been a great service all round, from the quality of the response from our Account Manager and support staff to the line itself. I can't remember the last time I had to log an issue... I couldn't fault Vaioni. ”

“ Efficient service. Nice team to work with, great to deal with, and would definitely recommend. ”

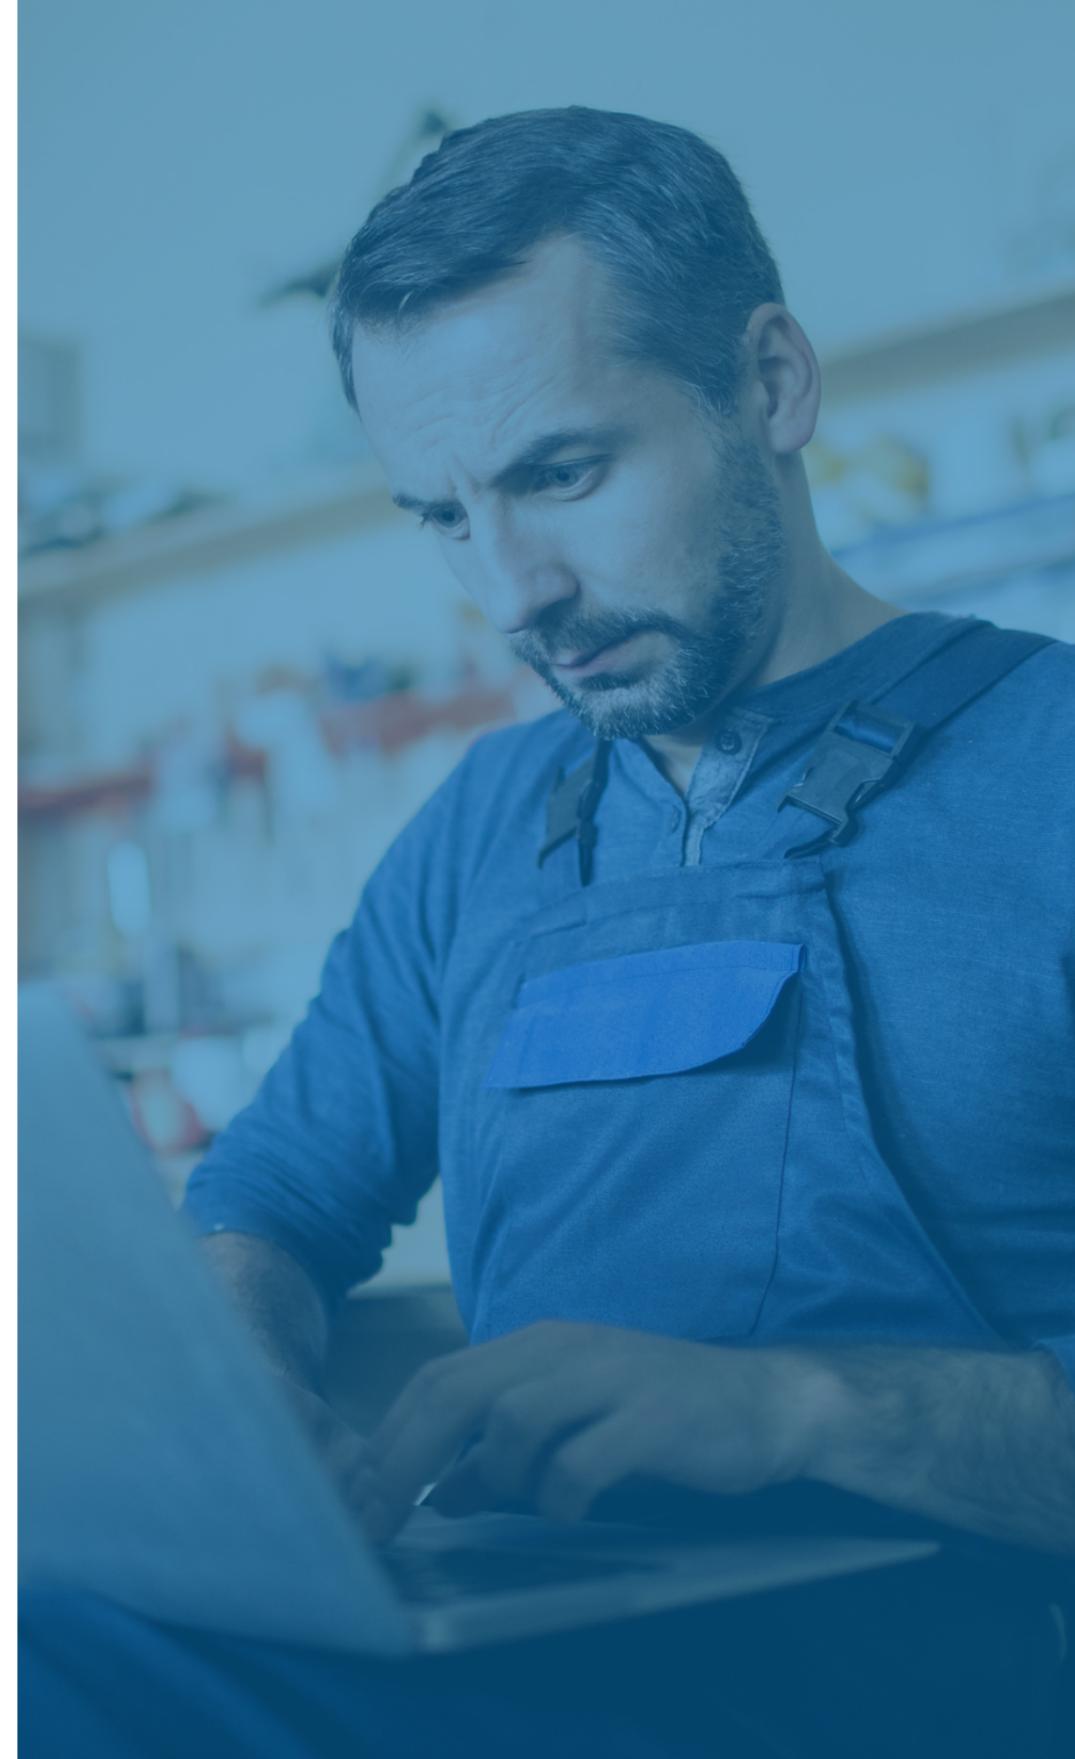

Why Vaioni?

We're connectivity experts; we have the awards and experience to prove it. Trusted by thousands of UK businesses, we've been providing vital connectivity services for over a decade, and there's no challenge too great or small that we can't tackle head-on.

Our connectivity proposition is founded on reliability and resilience. We own and operate our own high-performance, highly available network with 100% uptime guarantee; we're really proud of our uptime track record of over 3 years (our customers love it too).

As all of our products run over our network, you can be assured of the highest performance and availability of your entire critical business infrastructure. Our network is supported by the highly-skilled engineers that built and maintain it, so you can have complete confidence that you're in super-safe hands.

We're a small, friendly and responsive team with the freedom to be agile to meet our customers' needs. We guarantee we'll deliver exactly what your business needs to ensure you can thrive.
